Message from the Governing Board Chair

On behalf of my co-Governing Board members, I congratulate SEAMEO RECFON on its achievements during the Fiscal Year 2022-2023. Once again, the Centre has manifested its strong commitment to fulfill its vision and mission in providing food and nutrition knowledge and skills needed by its various stakeholders in the region through its mandates in capacity building, research, community development, information exchange and partnership.

We are pleased to see increases in the number of partnerships, publications, training alumni, and media exposures of the Centre as well as in acquiring several intellectual property rights certifications for its research outputs and training courses during the fiscal year in review. We also praise the Centre for continuously allowing its staff members to acquire new technical and administrative knowledge and skills to perform well their respective functions and help achieve the Centre's annual targets.

We commend SEAMEO RECFON's board of directors and staff members for their dedication to continue delivering services to bring about positive changes in practice and behaviours of its stakeholders related to food and nutrition. The Governing Board members feel privileged to be able to provide recommendations on the Centre's programs and activities to be more relevant to its stakeholders.

We believe that we will see more significant progress in the Centre's operation in the years to come!

Assoc. Prof. Dr. Mary Chong

Message from the Acting Director

The Fiscal Year 2022-2023 marked our Center's achievements during the COVID-19 pandemic transition towards the new normal situation. Our Centre seized all opportunities during the fiscal year in review to accomplish several milestones and improve our capacity to become a center of excellence in food and nutrition in Southeast Asia through our research, training, community development, information dissemination and partnership mandates.

We made various significant progress in implementing our two flagship programs on Nutrition Goes to School (NGTS) and Early Childhood Care, Nutrition and Education (ECCNE). In particular, we conducted more regional activities and engaged more stakeholders to promote these programs. We also published books on best practices of our partners in implementing these programs. Such achievements were made possible through the continued support of the Government of Indonesia, SEAMEO Secretariat, our Governing Board and our partner-institutions as well as through the cooperation and trust of our other stakeholders and beneficiaries.

We will certainly continue to commit our Centre to provide relevant and appropriate products and services in the areas of food and nutrition towards improved human resources in our region.

A handwritten signature in black ink, consisting of stylized, flowing letters.

Dr. Zainun Misbah, S.S., M.Sc

Acknowledgements

We highly appreciate the support and guidance from our Governing Board members, University of Indonesia, the Ministry of Education, Culture, Research and Technology of Indonesia as our host institution, the SEAMEO Secretariat, and the SEAMEO Council, for enabling our Centre to accomplish our targets for the fiscal year in review towards realizing our vision, mission and goals.

We also would like to extend our appreciation to our partner-institutions, particularly our academic and school partners, and the rest of our stakeholders for their continued collaboration and trust in us to implement research, capacity building and community development activities during the fiscal year in review towards achieving our common objectives together in the areas of food and nutrition.

We look forward to stronger and expanded partnerships in the future.

Executive Summary

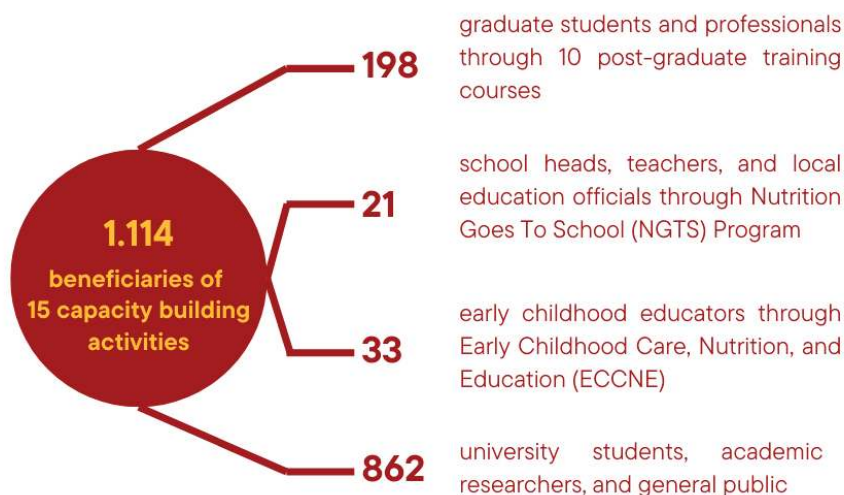

This annual report heralds SEAMEO RECFON's significant accomplishments during the fiscal year 2022-2023 under SEAMEO RECFON's Strategic Themes, namely: Regional Leadership and International and Global Visibility, Programme Excellence and SDG Relevance, Strategic Partnership and Stakeholder Engagement and Linkages.

Regional Leadership and International and Global Visibility

- Two regional learning exchange for a related to the Centre's Nutrition Goes to School (NGTS) and Early Childhood Care, Education and Nutrition (ECCNE) flagship programs.
- A Strategic Policy Dialogue on Nutrition for School-aged Children in partnership with the Coordinating Ministry for Human Development and Culture (CMHDC) of Indonesia, the World Food Program (WFP)-Indonesia, and Cargill.
- 164 consultancy services to government agencies, non-governmental organizations, academic institutions and the private sector that are mostly in Indonesia.
- Continuous capacity building of staff members to pursue graduate education, attend training courses, and join technical meetings related to food and nutrition.

Programme Excellence and SDG Relevance

- Funded seven research projects of university academic staff and school teachers related to the Centre's research areas and flagship programs; five of which received Intellectual Property Rights (IPR) certifications for the outputs produced.
- Four books on best practices in implementing the Centre's flagship programs on ECCNE and NGTS.
- Mapping the policies and programs related to Holistic and Integrative Early Childhood Development (HI-ECD) in Southeast Asia.
- Launching of the Southeast Asian Experts Hub in Food and Nutrition.
- 1,114 university students (undergraduate and graduate), academic researchers, local government officials, school teachers and principals, and early childhood educators benefited from 10 post-graduate training courses in support of the MS in Nutrition program of Universitas Indonesia; four national and regional trainings; and one webinar on "Food and Nutrition".
- First training course on "Healthy Canteen for School Communities in Southeast Asia" via Udemmy platform.

Strategic Partnership and Stakeholder Engagement and Linkages

- Three new Memoranda of Understanding with local government institutions and academic institutions.
- A Partnership Handbook.

SEAMEO RECFON at a Glance

Our Centre is one of the 26 specialist centres of the Southeast Asian Ministers of Education Organization (SEAMEO) established in 2011 and based in Jakarta, Indonesia. Through the years, our Centre has adopted the life span approach in providing food and nutrition interventions to combat malnutrition problems of our target groups in Southeast Asia. This approach is reflected in our three flagship programs, namely: (1) Early Childhood Care, Nutrition and Education (ECCNE) focusing on providing optimal growth and development for under-five children, (2) Nutrition Goes to School (NGTS) focusing on improving the eating habits of school-aged children and adolescents for better academic performance, and (3) Nutrition Goes to Workplace (NGTW) focusing on enhancing the wellbeing and productivity of the working community.

Our Centre is now operating under its Third Five-Year Development Plan (FYDP 2021/2022-2025/2026).

Our Vision

Be the center of excellence for building capabilities in food and nutrition for all in Southeast Asia.

Our Mission

To provide food and nutrition development options for better quality of life for all peoples of Southeast Asia

Our Goal

A quality lifespan for stakeholders at various levels through multi-sectoral and inclusive food and nutrition programs and activities that are suitable in a given context in Southeast Asia.

Our Mandates

Our Core Values

- I** - Integrity
- R** - Respect
- E** - Excellence and Empowerment
- C** - Commitment
- F** - Fortitude
- O** - Optimism
- N** - Nutrition for All

Strategic Theme 1

Regional Leadership and International and Global Visibility

1st Regional ECDP Learning Exchange Forum

On 1 August 2022, SEAMEO RECFON organized the First Learning Exchange Forum on Early Childhood Development Promotion (ECDP) in Southeast Asia as an activity to scale up the implementation of its ECCNE Program in the region. This virtual Forum provided the venue to share policies, programs, and practices in ECDP implementation in Southeast Asia. It featured SEAMEO RECFON's mapping results of ECCNE activities in the region and the experiences and challenges in ECDP implementation in Indonesia, Cambodia and the Philippines as presented by invited resource persons.

This Forum was also envisioned to contribute to achieving SEAMEO's Priority 1 on Universal Early Childhood Care and Education as well as Sustainable Development Goals No. 2, 3, and 4. The Forum drew interest from 57 early childhood educators, program implementers from government and development organizations, and academics from Brunei Darussalam, Cambodia, India, Indonesia, Lao PDR, Malaysia, Myanmar, the Philippines, Singapore and Thailand.

Establishment of the Southeast Asia ECDP Working Group

As part of its effort to expand its ECCNE program implementation in the Southeast Asian region, SEAMEO RECFON organized a virtual workshop on 2-3 August 2022 to establish the Southeast Asia ECDP (SEA-ECDP) Working Group. The SEA-ECDP Working Group was conceived to improve ECD implementation in the region considering the gains, challenges and opportunities besetting each country. The workshop consisted of country presentations on the current state of ECDP implementation and discussion on the proposed guidelines of operation for the Working Group.

The county presentations revealed common areas needing improvements in ECDP implementation in the region, namely: advocacy and enforcement of government regulations, coordination among concerned institutions in various sectors, building the competencies of ECD teachers versus limited number of specialists to provide capacity building, availability of standard and comprehensive ECD curriculum and learning materials/tools, parents education and engagement, provision of ECD services to both urban and rural households/ communities, differences in ECD services among ECD providers within a country, accreditation of ECD education centres/pre-schools, ECD databanking, and monitoring and evaluation of ECD programs and activities. These common concerns as well as the functions of the SEA-ECDP Working Group became the basis for the action plan development.

The workshop gathered 50 participants representing government, academic, and development organizations from 9 SEA Countries, Brunei Darussalam, Cambodia, Indonesia, Lao PDR, Malaysia, Myanmar, the Philippines, Singapore, and Thailand.

1st Regional SBNP Learning Exchange Forum

On 24 October 2022, SEAMEO RECFON virtually hosted the First Regional Learning Exchange Forum on School-Based Nutrition Promotion (SBNP). The speakers were Dr. Helda Khusun from SEAMEO RECFON, Ms Lailatul Machfudhotin from the Ministry of Education, Culture, Research and Technology of Indonesia, Dr. Airin Roshita from UNICEF Indonesia, Ms. Siti Adibah binti Ab Halim from the Ministry of Health of Malaysia and Dr. Rowell Capistrano from the Department of Education of the Philippines.

The presentations by the speakers emphasized the significance of implementing a comprehensive set of nutrition education interventions to effectively meet the nutritional and socioeconomic requirements of school children and adolescents. Having a good and sustained coordination among the parties and having a functional monitoring and evaluation system to properly keep track of the progress and impacts of SBNP programs were also highlighted in the presentations.

SEAMEO RECFON plans to conduct the forum biannually as part of its special initiative to scale up the implementation of its Nutrition Goes to School Program in the region throughout its Third Five-Year Development Plan period.

Co-Hosting of the Strategic Policy Dialogue on Nutrition for School-Aged Children

SEAMEO RECFON joined the Coordinating Ministry for Human Development and Culture (CMHDC) of Indonesia, the World Food Program (WFP)-Indonesia, and Cargill in organizing a Strategic Policy Dialogue on Nutrition for School-aged Children on 8 November 2022. The event solicited ideas from the attendees through two group discussion sessions.

The event was meant to reach a common understanding of existing nutrition policies for school-age children and identify strategies and opportunities among multi-sectoral stakeholders to enhance the implementation of Indonesia's National Action Plan on Improvement of the Well-being of School-aged Children and Adolescents (RAN PIJAR 2022) and School Health Program (UKS/M) in primary and secondary schools through effective use of existing resources, programs, and coordination mechanisms. SEAMEO RECFON conducted a study regarding the topic in 2022 as commissioned by WFP-Indonesia and Cargill.

Staff consultancies

SEAMEO RECFON staff members rendered a total of 164 consultancies in 2022 and 2023 for government institutions, non-governmental organizations, private sectors, educational/academic institutions, and SEAMEO Centres. (Please refer to **Appendix 12** for the complete list of consultancies).

Sustainable Human Resources

SEAMEO RECFON provided the following personnel development activities to its staff members towards improving their knowledge and skills in their respective work responsibilities, their working relationships with each other, and work motivation

1. SEAMEO RECFON Staff Team Building and Family Day

This event was held to foster employees' cohesiveness with each other as well as promote friendship among the employees' families. This two-day gathering was held at New Panjang Jiwo Resort, Sentul, Bogor on 16-17 December 2022.

The staff members received talks on inter-professional and staff collaboration from Dr. dr. Retno Asti Wedhani and Prof. Dr. dr. Endang Basuki from Universitas Indonesia. Field games focused on team communication and coordination as well as knowing bits of personal information of colleagues.

Figure 2. Staff Team Building & Family Day Activities

2. Annual Medical Check Up

Maintaining employees' health and safety is one of SEAMEO RECFON's routine activities to improve their health status and work productivity, as well as to prevent and detect illness that can be due to their working conditions. Thus, SEAMEO RECFON carried out the annual medical check-up for its 53 employees on 31 October and 1 November 2022. The medical check up included measurements of HbA1C, fasting sugar, uric acid, total lipid, Vitamin D, micronutrient, BMI, body composition, ECG and treadmill.

3. SEAMEO RECFON Service Award 2022-2023

SEAMEO RECFON conferred the SEAMEO Service Award for 2022/2023 to Dr. Dwi Nastiti Iswarawanti in recognition of her dedication and contribution to the Centre's advancement in the field of food and nutrition.

The Centre also recognized the longest serving staff members in the persons of Mrs. Ratna Wulanti (Research Unit Administrative staff) and Mrs. Siti Mirza Ellya Nurdin (Laboratory and Consultancy Unit Staff). Both of them have been serving the Centre for 10 years.

4. Employee Training and Other Capacity Building Activities

SEAMEO RECFON held four (4) training activities for its employees on document control and digital filing system, Good Manufacturing Practice (GMP) application in the food industry, HACCP documentation system organization, and Methods validation and data treatment of validation result at laboratory. The Centre also continued to conduct its regular Fun Fridays where staff members share information on different topics, and the bi-weekly aerobic exercises. The staff members also attended a seminar on stress management during its 13th year anniversary.

Strategic Theme 2

Programme Excellence and SDG Relevance

Completed RFP Projects

SEAMEO RECFON awarded research grants to three academicians and four school teachers in 2022 under the Centre's Request for Proposals (RFP) Program.

The topics covered in the academics' category were on assessment of the web-based monitoring information system of the NGTS program, enhancing the health, nutritional status, and productivity of school teachers in Indonesia, and developing assessment tools for early detection of nutrition risk factors and the health of urban workers.

The topics for the school teachers' category focused on innovation in learning methods during the post-pandemic period, application of the ECCNE module in the classroom, and development of learning modules integrated with school lessons.

HAKI of Research Outputs

Five research fund grantees of SEAMEO RECFON received Intellectual Property Rights (IPR) certifications for the outputs of their research projects conducted in 2022. These outputs comprised four learning media resources and one research instrument, namely: "Ayo Mencari Tahu" booklet, E-MUEGIZ Module, KOLAGEN Learning Media, RODADE Learning Module, and PRISAT Instrument. The certification was issued by the Ministry of Law and Human Rights of Indonesia.

1. **Booklet "Ayo Mencari Tahu"** (Let's Find Out) is an educational media for primary school children about balanced nutrition through the consumption of nutritious food sources. It provides a worksheet with theoretical and practical questions for the students.

Figure 3. Learning Media Booklet "Ayo Mencari Tahu"

2. **E-MUEGIZ** is an electronic teaching material for grade 10 senior high school students. E-MUEGIZ is a contraction for “E-Modul Usaha dan Energi Terintegrasi Gizi” in Bahasa Indonesia or “E-Module on Integrating Nutrition in Work (W) and Energy (E) Concepts” in English. This module, which can be accessed through an Android mobile phone, is a problem-based learning model that depicts the relationship between physics and nutrition (especially about obesity and stunting). It contains pre- and post-test questions, learning material, worksheet (case study), video, and exercises for the students to have more fun in learning physics and nutrition concepts, as well as improve their learning outcomes.

Figure 4. Nutrition Educational Module (E-Modul Edukasi Gizi/E-MUEGIZ)

3. **KOLAGEN** is a learning module in both electronic and print versions which explains about balanced nutrition, essential nutrient contents of various foods, and “Isi Piringku” (My Plate) concept. This module also provides a worksheet for primary school children where they can draw the exact portion of food they consume using the “Isi Piringku” template. KOLAGEN is a contraction for “Kelas Online Gizi SD Negeri Pandeyan” in Bahasa Indonesia or “Online Nutrition Class for Pandeyan National Primary School” in English.

Figure 5. KOLAGEN (Kelas Online Gizi SD Negeri Pandeyan) Learning Module

4. **RODADE** (Reading, Observation, Discussion, Application, Documentation, and Evaluation) is a science learning model for senior high school students, particularly about food safety. It focuses on group project-based learning activity among students to develop a smart detector for illegal food additives such as borax and formalin. RODADE model is available in both online and offline versions as a response to learning methods during and post-COVID-19 pandemic.

Figure 6. RODADE Learning Model to Develop Smart Detector for Illegal Food Additives

5. **PRISAT** (Productivity Risk Self-Assessment Tools) is a research instrument which consists of eight closed-ended questions (dichotomy) to identify the risk factor of non-communicable diseases (NCDs) that can lead to productivity reduction in urban workers. The answer for each question will be counted and the total score will be categorized into low-risk and high-risk NCDs.

1. e-book on Best Practices in ECCNE Implementation

In 2022, SEAMEO RECFON launched an e-book titled "*Praktik Baik Pelaksanaan Program Anakku Sehat dan Cerdas*" (Best Practices in Early Childhood Care, Nutrition, and Education Program Implementation), which aims to assist early childhood education teachers.

The e-book showcases the best practices of two local government partners, namely Tanjung Jabung District in Jambi Province and East Lombok in Nusa Tenggara Province, that have implemented the ECCNE program for three years. These best practices were compiled through focused group discussions involving local government officials, academic partners, ECCNE master trainers, early childhood education teachers, and parents at the program sites. The e-book also provides information on SEAMEO RECFON's efforts to translate the holistic integrative Early Childhood Education (ECE) program, known as PAUD-HI in Indonesia, into a model that emphasizes parenting and nutrition education using local-based complementary feeding recommendations (PGS-PL).

The e-book can be accessed for free at the website of SEAMEO RECFON website and the National Library of the Republic of Indonesia. With **ISBN 978-623-7759-85-0 (PDF)**

Figure 8. Best Practices in Early Childhood Care, Nutrition, and Education Program Implementation's Book

2. Printed and e-books on Best Practices in NGTS Implementation

SEAMEO RECFON produced three books that compile the best practices of its school partners in Indonesia in implementing their respective NGTS programs. The school partners featured in these books consisted of 12 elementary schools, 12 junior high schools, and 14 senior high schools. The information contained in these books includes school profiles, a summary of the NGTS program's implementation, challenges faced, solutions for improvement, and key success factors identified by the NGTS team of each school. The books are intended to be a useful reference for planning and implementing school-based nutrition and health programs in Indonesia and other countries. The NGTS best practice books are freely available on SEAMEO RECFON website.

Figure 9. Book Best Practices in the Nutrition Goes to School Program in Indonesia for

b) Junior High School
c) Senior High School

Journal Articles

SEAMEO RECFON was able to publish 11 scientific articles in international refereed journals during the fiscal year in review. Details of these articles are contained in **Appendix 6**.

Training Courses and Webinars Conducted

From July to December 2022, SEAMEO RECFON conducted four post-graduate trainings via online mode. One Master of Trainers course was also held during the same period for government officials of Ogan Komering Ulu District to support the implementation of the Centre's ECCNE flagship program. SEAMEO RECFON also provided a training to government officials of Brebes and Tegal districts to strengthen their commitment in implementing their stunting prevention programs and activities. Furthermore, Training on Food Safety and HACCP also was conducted in 2022.

During the first half of 2023, SEAMEO RECFON conducted six post-graduate training courses, a “Food and Nutrition” Webinar, as well as the first offering on an online course on “Healthy Canteen for School Communities” via Udemy platform (more details on this on the next page).

Launching of SEAMEO RECFON Experts Hub

The types, quality, and availability of food and nutrition experts differ from one Southeast Asian country to another. Thus, SEAMEO RECFON took the initiative to establish the Southeast Asian Food and Nutrition Experts Hub as part of its Third Five-Year Development Plan (FY 2021/2022-2025/2026). The Experts Hub was launched to address the pressing need for multidisciplinary experts to collaborate and expedite efforts in tackling malnutrition problems in the region.

Figure 10. SEAMEO RECFON Food and Nutrition Experts Hub Brochure

SEA ECCNE Mapping

In continuing its commitment to promote early childhood development in Southeast Asia, SEAMEO RECFON initiated the mapping of the implementation of Holistic and Integrative Early Childhood Development (HI-ECD) in the Southeast Asian region. This is the first time that HI-ECD indicators in the region will be mapped. The mapping will set a standard for data collection on HI-ECD targets and document the challenges and good practices in early childhood education in Southeast Asia. The results of the mapping will be used to develop programs and models, individual and institutional capacities, and policies related to ECCNE in the region. The initial mapping results were presented during the First Regional Early Childhood Development Promotion Learning Exchange Forum on 1 August 2022.

New Learning Materials Developed

SEAMEO RECFON developed two learning materials to help build capacities in implementing food and nutrition programs in Indonesia. These materials include classical and distance learning curriculum on Community Nutrition Management, and Food Safety and Hazard Analysis and Critical Control Point (HACCP). The Centre obtained accreditation from the Ministry of Health and Intellectual Property Rights certifications from the Ministry of Law and Human Rights of Indonesia in August 2022 for these learning materials.

Offering of Healthy School Canteen Course via Udemy Platform

Following the successful implementation of an online course on Healthy School Canteen in 2021 in collaboration with IMU Centre for Transformative Nutrition and Health (CTNH), Malaysia, SEAMEO RECFON offered the same course via Udemy platform for the first time from 13 March to 31 May 2023. The training is a self-paced training, which enables the participant to finish the course independently.

Forty-nine (51%) out of 96 listed applicants on google form pursued the course. Twenty-one (42.8%) out of 49 enrolled participants completed and passed the course.

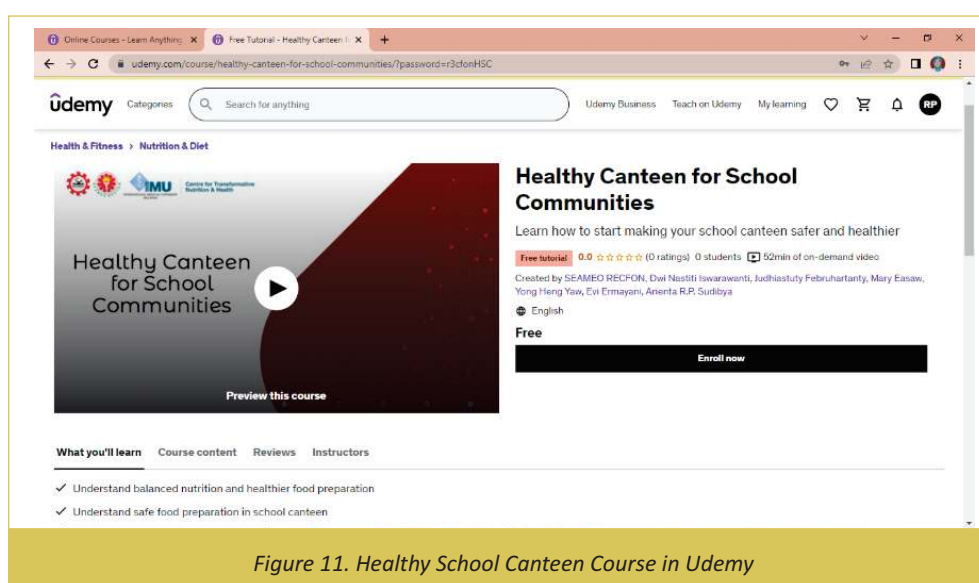

Figure 11. Healthy School Canteen Course in Udemy

Internship Programme

SEAMEO RECFON accepted 20 intern students during 2022-2023 as follows:

- a. Twelve Indonesian undergraduate students from the vocational education program of Universitas Indonesia (UI) and Faculty of Chemistry of Universitas Pendidikan Ganesha (Undiksha) who did internship with the Centre's Laboratory and Consultancy Unit. The UI students produced a video on laboratory sample packaging and shipping procedures while the Undiksha students performed actual laboratory operations.
- b. Two French undergraduate students from Paris Descartes University who did internship with the Centre's Community Development and Partnership Unit by having field exposures to activities of NGTS Nutrition Goes to School Program in Bogor, Cirebon and Jakarta sites in West Java and giving presentations on French Food Culture to students of schools they visited.
- c. Four Indonesian vocational school students who did internship with the Centre's Human Resources and General Administration Unit by attending to daily office communications, inputting administration data and filing of documents.
- d. Two Indonesian diploma students who did internship with the Centre's Accounting and Finance Administration Unit by checking and recording transaction receipts of research projects and inventory of Centre assets.

Strategic Partnership and Stakeholder Engagement and Linkages

MoUs and MoAs Signed

SEAMEO RECFON signed three new and one extended memorandum of understanding (MoU) with relevant government and academic institutions in Indonesia. The Centre has 30 active ongoing MoUs during the fiscal year. The list of signed partnerships in July 2022 – June 2023 is detailed in **Appendix 8**.

Figure 13. MoUs and MoAs signed

Development of SEAMEO RECFON Partnership Handbook

Through the help of a consultant, SEAMEO RECFON came up with a partnership handbook in response to the growing number of collaborations forged by the Centre in recent years. The development of the handbook was aimed to guide the Centre in establishing new partnerships and strengthening existing ones towards a more functional, win-win and sustainable collaborations.

The handbook has three chapters that contains concepts and principles of partnership, stages in partnership development and maintenance as well as tools for each stage.

Model pembelajaran dalam modul ini menggunakan Problem - based Learning yang memiliki beberapa sintak, yaitu: (1). Orientasi pada masalah; (2). Mengintegrasikan siswa untuk belajar; (3). Membimbing penyelidikan; (4). Mengembangkan dan menyajikan hasil; (5). Menganalisis dan mengevaluasi. Masalah yang diangkat untuk dianalisis siswa adalah kasus obesitas dan stunting. Modul dilengkapi dengan soal pretes, materi, lembar kerja yang berisi kasus untuk dianalisis, video, contoh soal dan soal evaluasi. Harapannya dengan menggunakan modul ini siswa bisa belajar fisika dengan lebih menyenangkan, memahami konsep gizi dengan baik dan meningkatkan hasil belajar.	19 June 2022, in Jakarta	2 December 2022
