

Major Accomplishments of SEAMEO RECFON's Flagship Programs

Early Childhood Care, Nutrition, and Education (ECCNE) Program

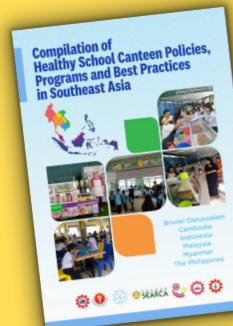

- Mapped the sociodemographic and knowledge profiles of 78.711 early childhood educators in Indonesia as basis for interventions needed in piloting the program.
- Developed 2 ECCNE Models:
 1. Post-Disaster Recovery-based Model in 2018
 2. Early Childhood Education Centre-based model in 2019
- Published 9 ECCNE Modules for capacity building of early childhood educators (ECE), local government officials and parents, and 2 modules on strengthening ECCNE for educators and parents using long distance learning.
- Trained 1592 ECE educators from 1391 ECE centers on the ECCNE Modules.
- Built the capacities of 569 local government officials and university staff and constituted them as ECCNE Master of Trainers (MoT) teams from 79 districts/cities in Indonesia.
- Conducted Partnership Workshops with 14 Stunting Priority Districts in supporting national stunting reduction program of Indonesia.
- Signed Memoranda of Agreement on ECCNE integration into stunting convergence efforts with local governments from 16 stunting priority districts in Indonesia.
- Published 3 research project results related to ECCNE in international and national refereed journals.
- Mapped the ECCNE profiles of SEAMEO countries.
- Formulated local specific food-based recommendation diets for under-5 children from 50 stunting priority districts of Indonesia.
- Adoption of FBRs for under-five children from 50 stunting priority districts in Indonesia by the National Population and Family Planning Board (BKKBN) which is the lead institution for stunting convergence at the national level.
- Compiled ECCNE best practices in Indonesia for printing in 2023.
- Initiated the establishment of Southeast Asian Early Childhood Development Promotion Working Group.
- Conducted the 1st Learning Exchange Forum on Early Childhood Development Promotion.

Nutrition Goes to School (NGTS) Program

- Mapped the readiness of schools in Indonesia as basis for interventions needed in piloting the program in 2017.
- Piloted the Program in 7 locations in Indonesia involving 60 schools which are now entering the institutionalization phase, and 21 schools from 19 districts beyond the location focus.
- Conducted Training on Nutrition and Health of School Children and Adolescent for a total of 2,696 school teachers and school principal from 754 schools in Indonesia (online training) and 564 school teachers and school principal from 160 schools (face-to-face training).
- Developed the following learning/reference materials.
 1. Handbook of Nutrition and Health for School-Aged Children and Adolescent.
 2. Manual on Healthy School Canteen.
 3. Manual on Nutrition Education through School Garden.
 4. Southeast Asian School-Based Nutrition Promotion Country Profiles for Brunei, Indonesia, Lao PDR, Philippines, and Thailand for printing in 2023.
 5. Healthy School Canteen Policies, Programs and Best Practices in Southeast Asia Reference Book (featuring Brunei, Cambodia, Indonesia, Malaysia, Myanmar, and Philippines) for printing in 2023.
 6. Compiled NGTS Best Practices of 40 school-partners in Indonesia for printing in 2023 soon.
- Established the Southeast Asian School-Based Nutrition Promotion Working Group as an advocacy arm of the NGTS Program.
- Conducted NGTS training to teachers in Timor Leste and Cambodia.
- Initiated the NGTS SOLUTIONS Webinar Series that features school teachers as resource persons, and SEA NGTS Webinar Series.
- Developed a web-based NGTS Monitoring Information System.
- Conducted the 1st regional online training course on Healthy School Canteen in SEA; the curriculum of which has obtained intellectual property certification from the Ministry of Law and Human Rights of Indonesia.
- Conducted 2 regional Youth Creativity in Nutrition (CREATION) competitions.

Nutrition Goes To Workplace (NGTW) Program

- Held a stakeholder consultation for the soft launching of the Program in 2021 to obtain feedback and support to the Program's framework of operation and roadmap.

NGTW Roadmap

- 2021-2022: Compilation of lessons learned on implementation of policies and programs on health promotion in the workplace in Southeast Asian countries.
- 2022-2023:
 1. Benchmarking of nutritional status and eating habits of school teachers in Southeast Asia as primary targets of the Program;
 2. Development of promotional and capacity building materials; and
 3. Establishment of working groups and partnerships with workers' and employers' organizations in Southeast Asia.
- 2022-2024: Piloting and evaluation of the NGTW Program in Indonesia.
- 2024-2026: Expansion of the NGTW Program in other countries in Southeast Asia.
